Mechanism

Two multi-stage root-rotors rotate without contact,
compressing gas for exhaust.

No oil in pumping room: Dry pumping with
"Clean exhaust"

No cooling water:
"Air cooled"

"Gas ballast port" (optional) can
take gas to reduce partial pressure
of condensation-prone gas, and
prevent it from condensation inside.

Roots rotors rotate without contact
arising no particle.
**"No performance
deterioration and long life"**
